

FAST RELOCATION SUPPORT

Relocation is a key factor in successfully delivering Fast Enterprises' software systems. By moving to our clients' locations, we can work alongside agency staff to better understand, implement, and provide the public with essential services. Employees can expect to move every 2–3 years with some shorter-term relocation options available on occasion.

Relocation is not the same as traveling—it is a long-term commitment to our clients and the communities they serve. While you will get to experience the excitement of moving to and exploring new places, it can be challenging to uproot your life and start fresh somewhere else. We know the decision to relocate is a big one. To make the process easier, FAST has an in-house team dedicated to helping you navigate your move!

FAST RELOCATION SUPPORT

Thinking about relocating? Awesome!

FAST provides a range of resources to make the process easy for employees and their families. A typical relocation package includes the support detailed below.

Pack and Load

FAST will pay to move your belongings to your new location. If you need a full-sized moving truck, FAST will hire movers to help you pack your belongings and deliver them to your new location. For smaller moves, you'll be guided through the process of shipping your belongings and submitting receipts for reimbursement.

Hotel Stay

Once you arrive at your new location, FAST will provide a two-week hotel stay for you to explore the area and find a place to live. Don't worry about being stuck in an empty home—if your belongings are delayed, your hotel stay will be extended until your goods arrive.

Flights and Vehicles

Travel and transportation will depend on how far away your new assignment is. For farther locations, FAST will fly you to your new location, ship your vehicle to you, and provide a rental car for the interim. If you drive to your new location, FAST will assist with hotel costs and mileage.

Built-In Support System

Moving to a new location can be intimidating, but you won't undergo your relocation alone—the FASTies on our project sites have also relocated and will be excellent resources for getting acclimated to the area. You'll be connected with a Site Ambassador who can share their relocation experiences, advise on local neighborhoods, and recommend restaurants, activities, and anything else that is important to you!
